Exploratory Data Analysis(EDA)

Conclusion

OBJECTIVE

The main objective behind this project is to explore and analyse data to discover important factor that govern the bookings and give insights to hotel management , which can perform various campaigns to boost the business and performance.

For this project, we will analyze Hotel Booking data. The data set contains booking information for a city hotel and a resort hotel.It also includes information such as when the booking was made , length of stay , the number of adults , children , or babies, and the number of available parking spaces.

DATA SUMMARY

The data set has 32 columns of variables crucial for hotel booking. Some variables are as follows:

- hotel: The category of hotel (City or Resort).
- is_canceled: Whether the booking is canceled or not (0 for no canceled and 1 for canceled).
- lead_time: time (in days) between booking transaction and actual arrival.
- stays_in_weekend_nights: No. of weekend nights spent.
- stays_in_week_nights: No. of weeknights spent in a hotel.
- arrival_date_year: Year of arrival
- arrival_date_month: Month of arrival
- meal: Type of meal chosen(BB,FB,HB,SC,Undefined)

- market_segment: What segment via booking was made and for what purpose.
- distribution_channel: Medium through which booking was made.
- is_repeated_guest: Whether the customer has made any booking before(0 for No and 1 for Yes).
- previous_cancellations: No. of previous canceled bookings.
- previous_bookings_not_canceled: No. of previous non-canceled bookings.
- days_in_waiting_list: No. of days on waiting list.
- customer_type: Type of customer(Transient, Group, etc.)
- adr: Average Daily rate.
- required_car_parking_spaces: No. of car parking asked in booking.
- country: Country of origin of customers.

EXPLORATORY DATA ANALYSIS

PERCENTAGE OF BOOKINGS IN CITY HOTEL AND RESORT HOTEL

INFERENCE:

The city hotel has 60% bookings while the resort hotel has 40% bookings.

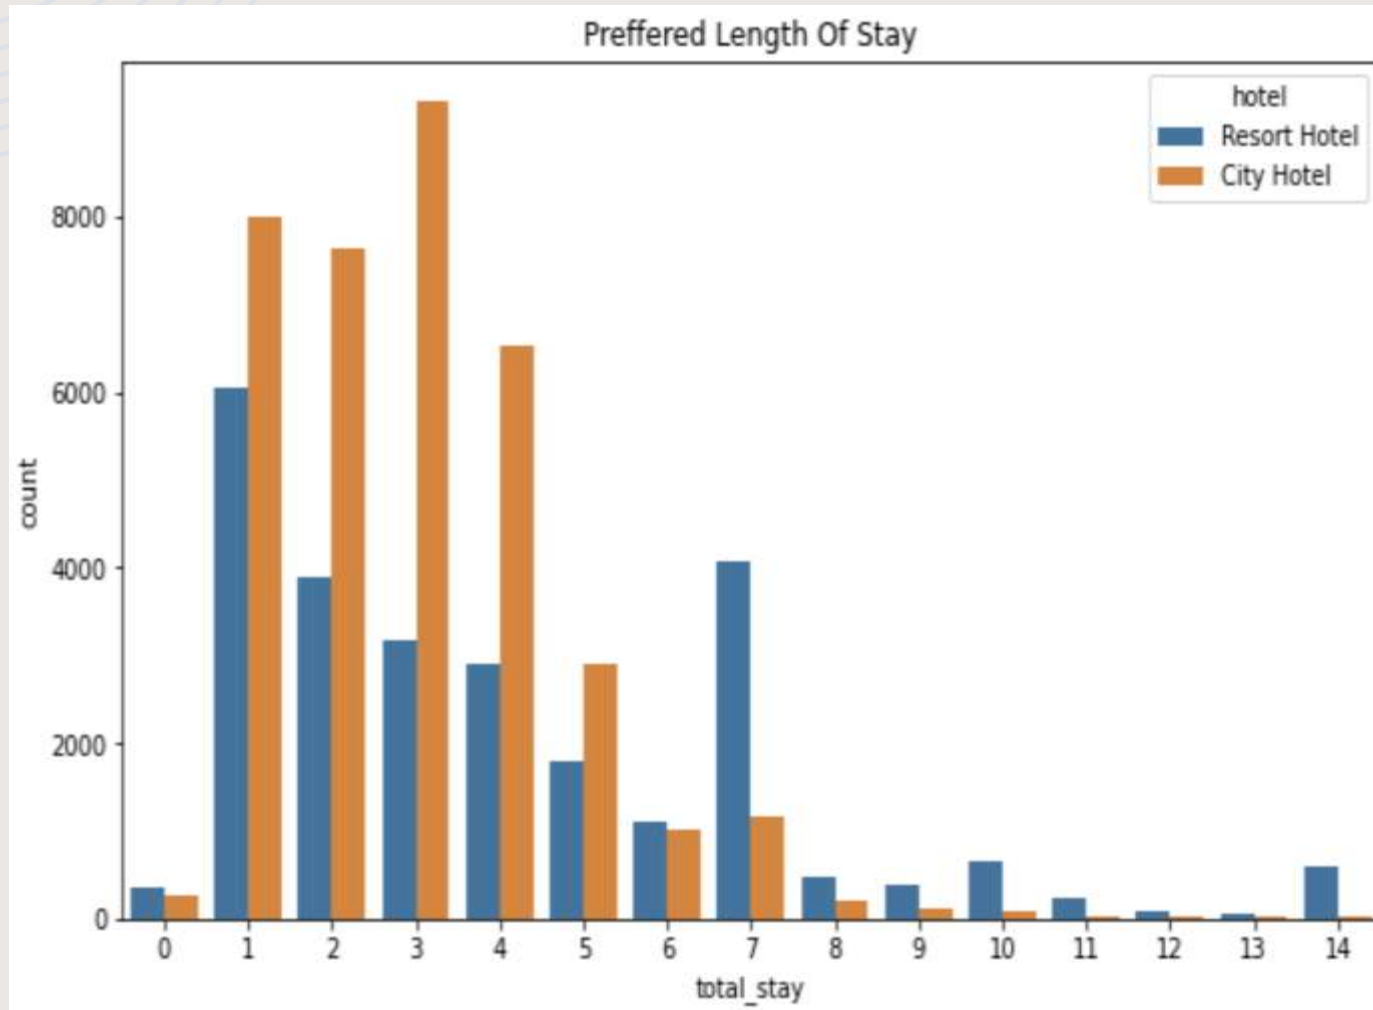

HOTEL WITH LONGER WAITING TIME

INFERENCE:

City hotel has slightly longer waiting time. Hence, it is most busier than resort hotel.

PREFERRED LENGTH OF STAY IN EACH HOTEL

INFERENCE:

Preferred length of stay in city hotel is around 3 days and in resort hotel is around 7 days.

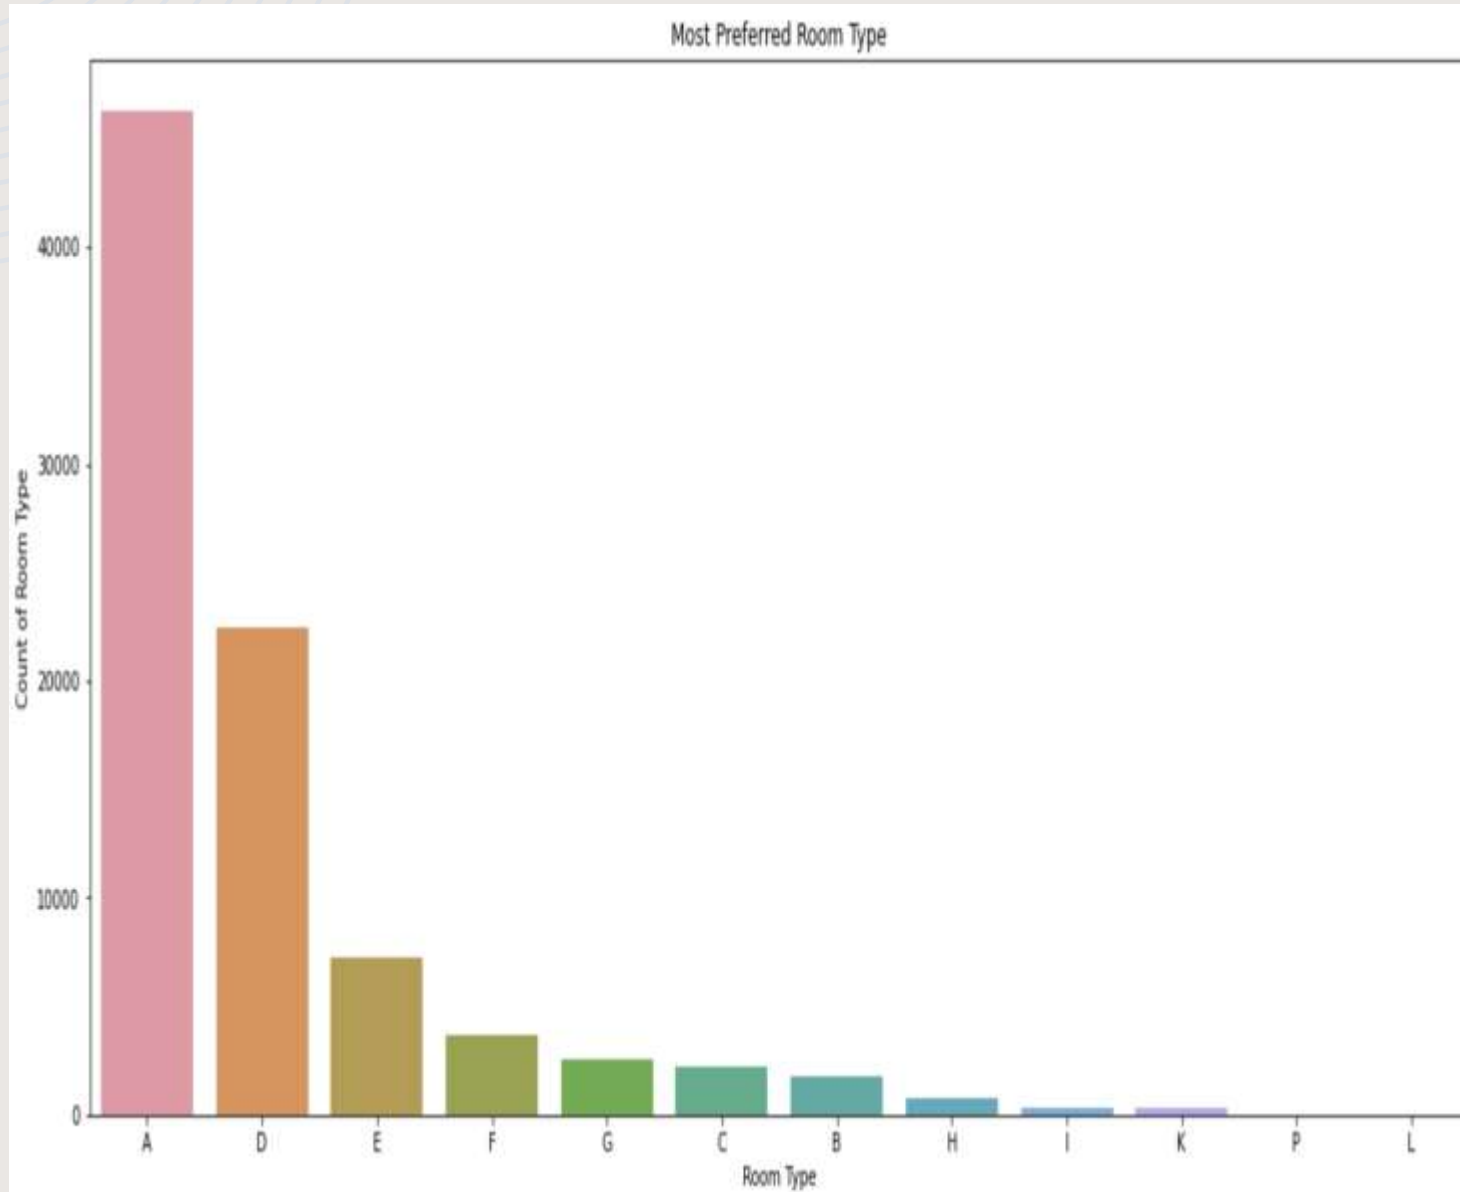

HOTEL MAKING HIGHEST REVENUE

INFERENCE:

City hotel seems to be making slightly more revenue.

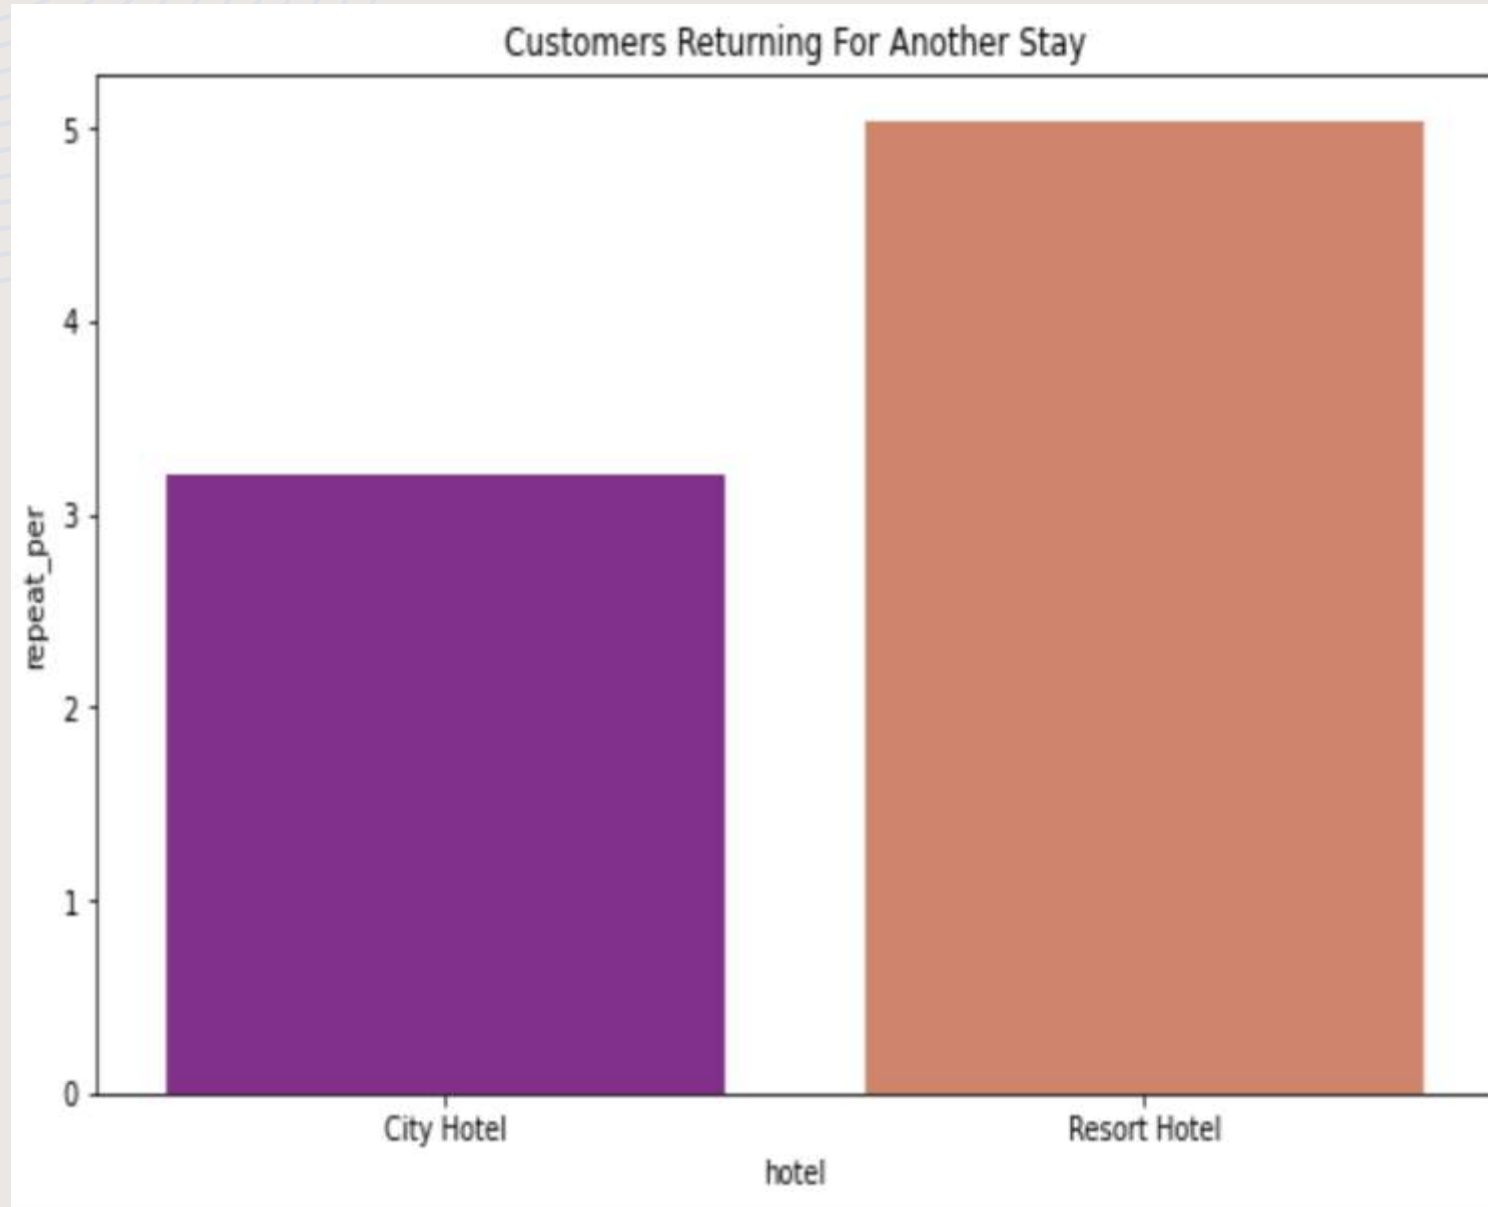

ROOM TYPE PREFERRED BY THE CUSTOMER

INFERENCE:

Most preferred room type is 'A'.

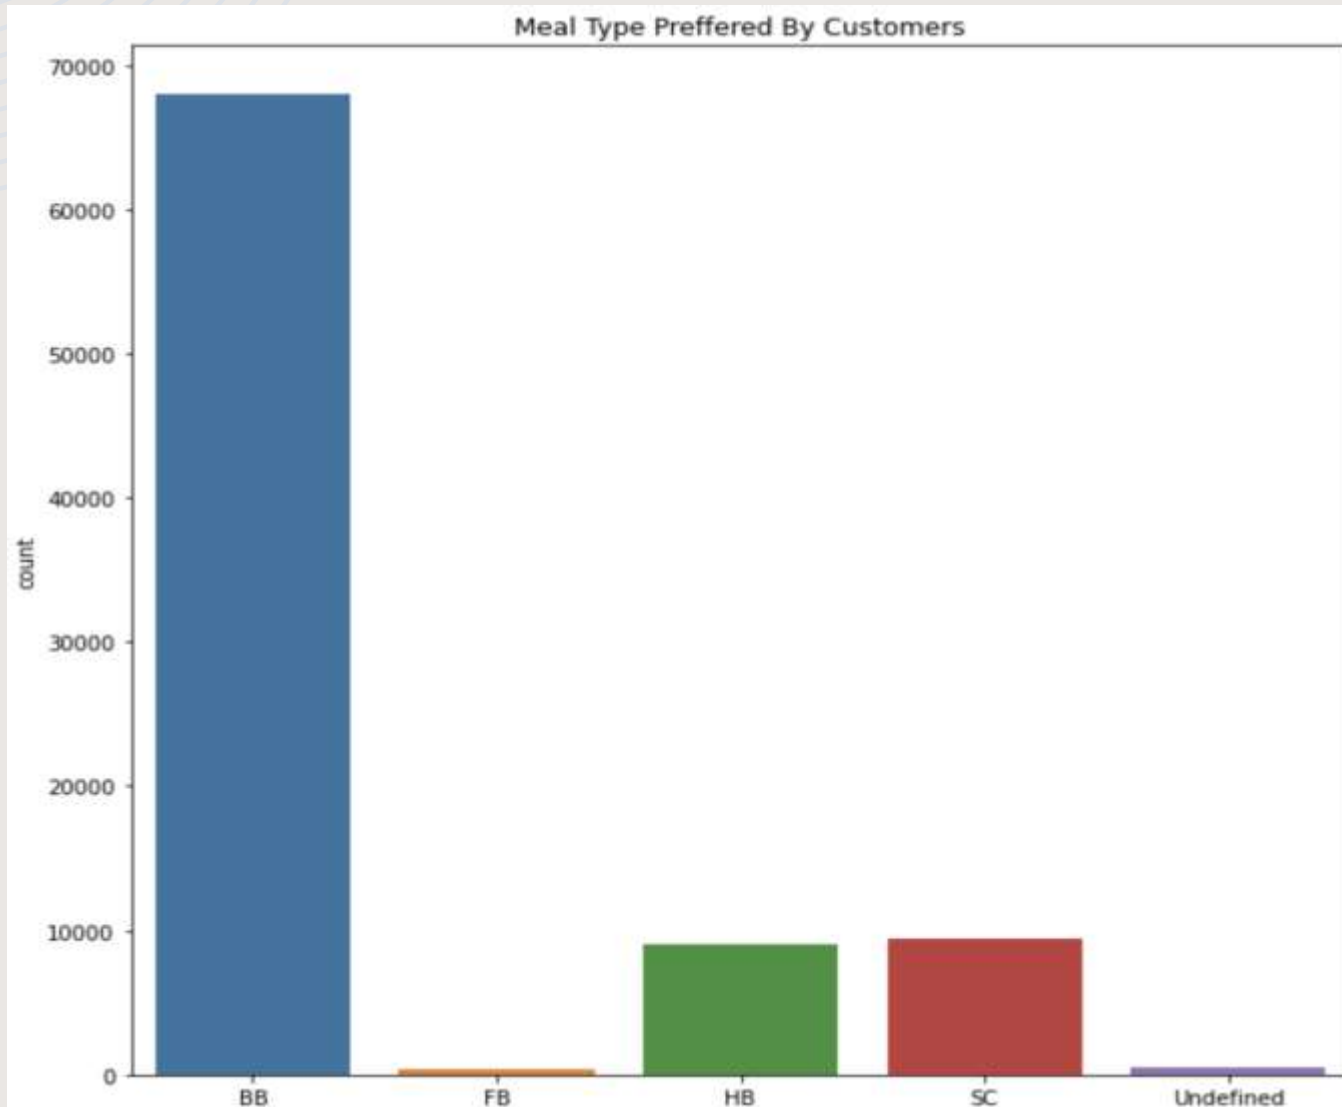

HOTEL WITH HIGHER CHANCE OF CUSTOMERS RETURNING FOR ANOTHER STAY

INFERENCE:

The resort hotel has higher chance of customers returning for another stay.

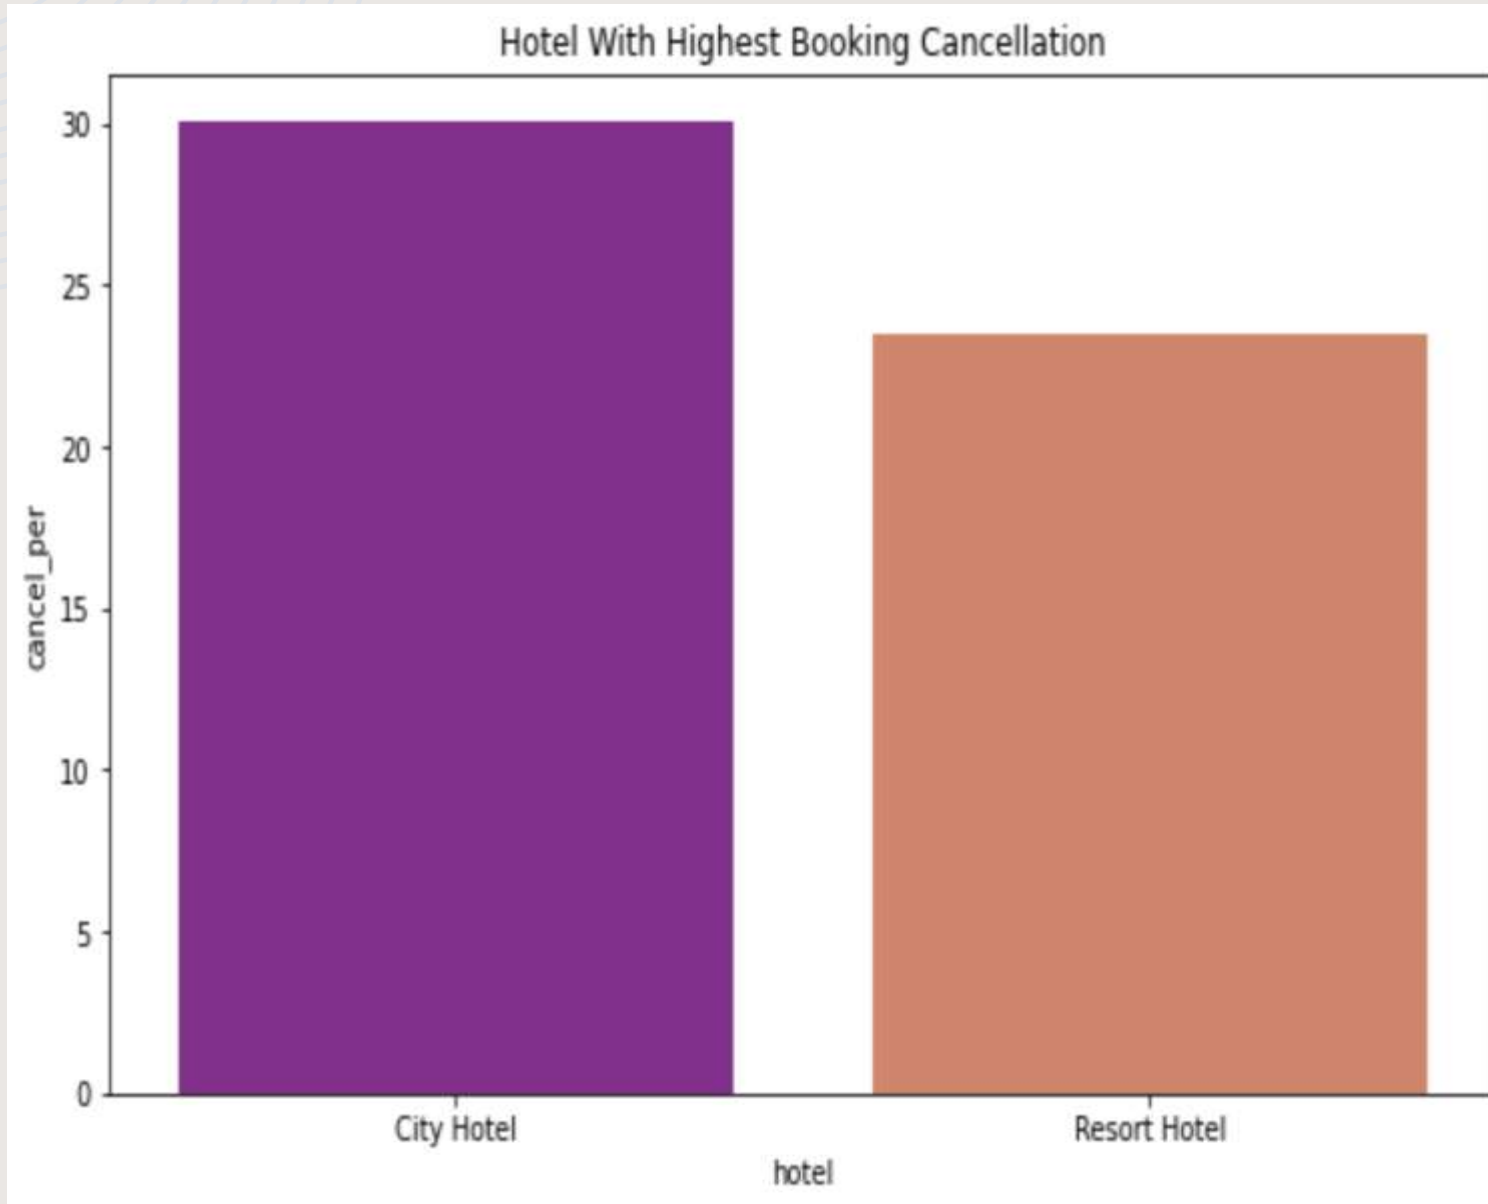

MOST PREFERRED MEAL TYPE BY CUSTOMERS

INFERENCE:

Most preferred meal type is BB (Bed and breakfast).

HOTEL WITH HIGHEST BOOKING CANCELLATION

INFERENCE:

The rate of cancellation of booking is highest in city hotel.

Strategy to Counter Cancellation:

- Set Non-refundable Rates, Collect deposits, and implement more rigid cancellation policies.
- Encourage Direct bookings by offering special discounts
- Monitor where the cancellations are coming from such as Market Segment, distribution channels, etc

YEAR WITH HIGHEST NUMBER OF BOOKINGS

INFERENCE:

City hotels had the most of the bookings.

2015 had less than 7,000 bookings.

2016 had the highest bookings.

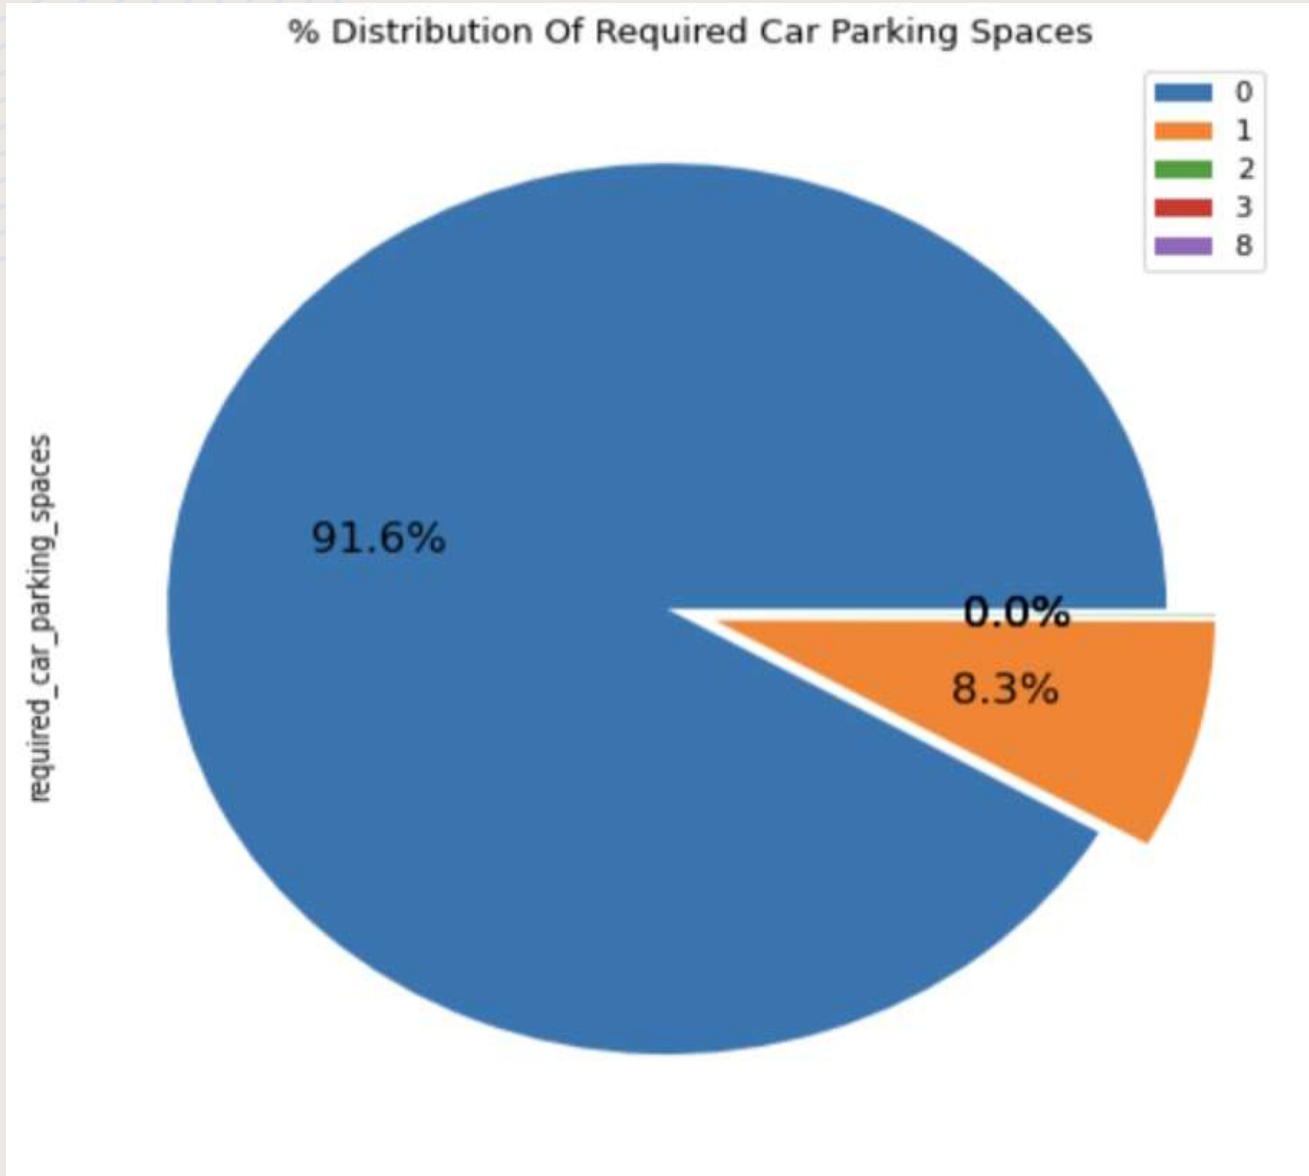

NUMBER OF GUESTS FROM DIFFERENT COUNTRIES

INFERENCE:

Most of the guests are coming from Portugal i.e. more than 25,000 guests are from Portugal.

PERCENTAGE DISTRIBUTION OF REQUIRED CAR PARKING SPACES

INFERENCE:

91.6 % guests did not required the parking space.
Only 8.3 % guests required only 1 parking space.

AGENT MAKING MOST NUMBERS OF BOOKINGS

INFERENCE:

Agent no. 9 has made most no. of bookings.

THE MONTH WITH MOST VISITORS

INFERENCE:

The month of august welcomes the most number of guests.

HIGHEST REVENUE GENERATING MONTH

INFERENCE:

Resort in the month of August generates highest revenue.

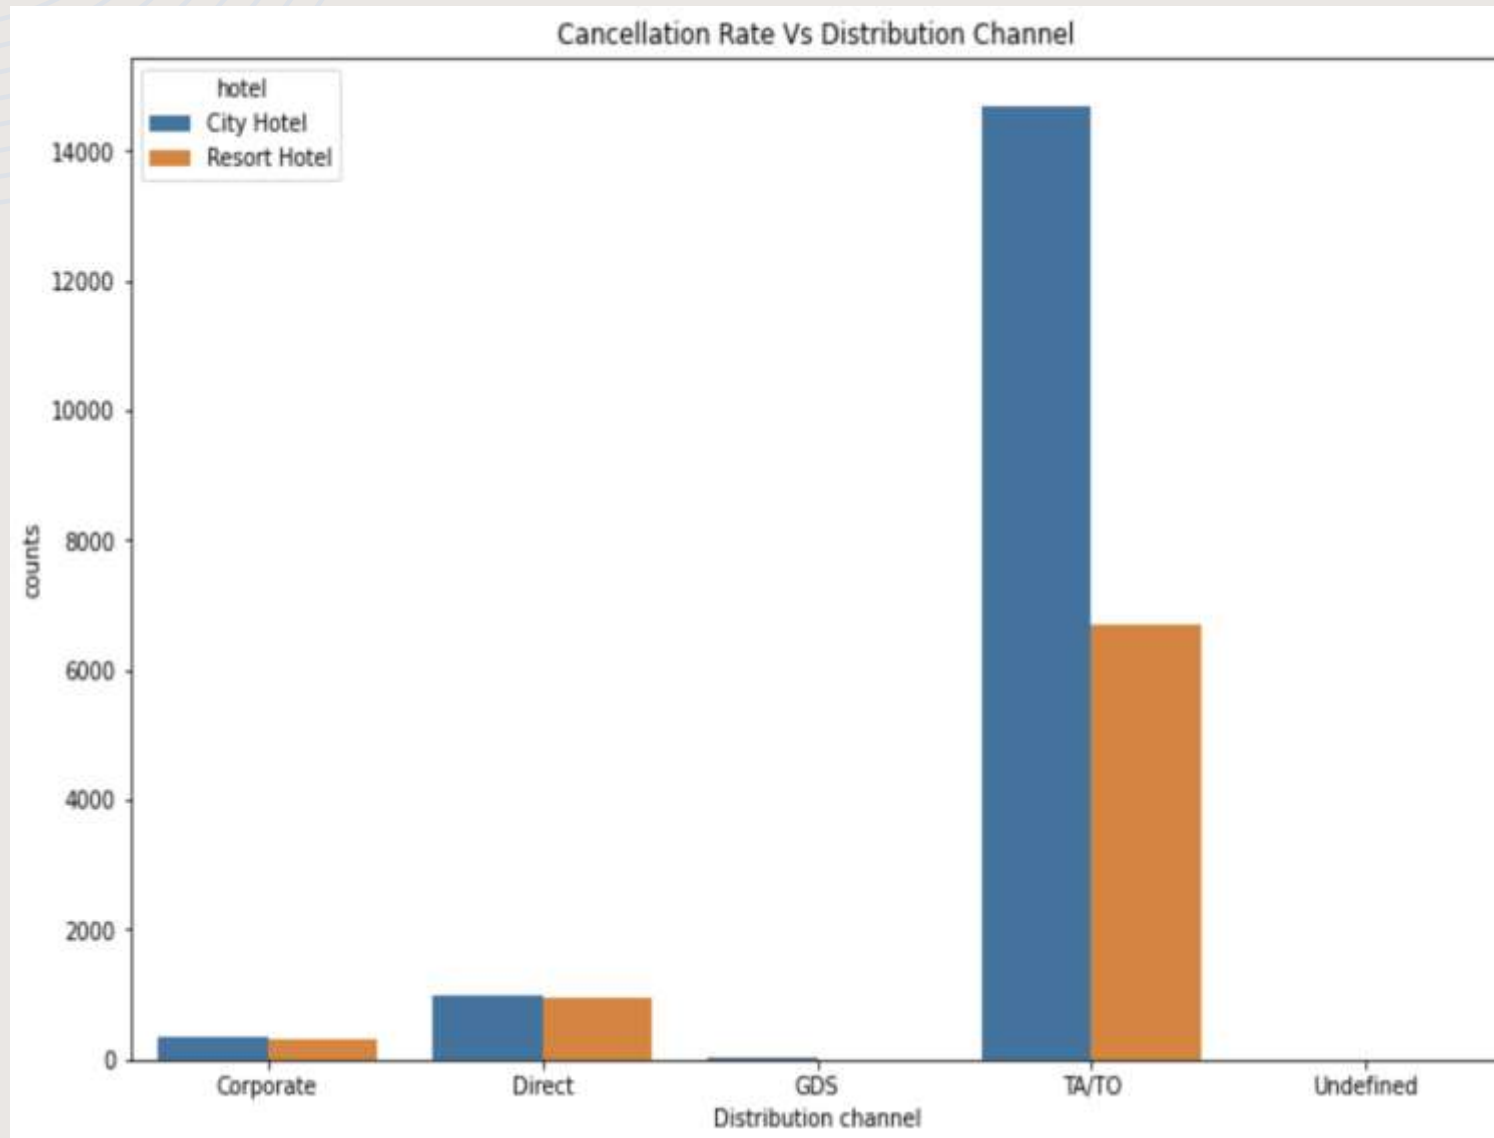

MOST COMMON CHANNEL FOR BOOKING HOTEL

INFERENCE:

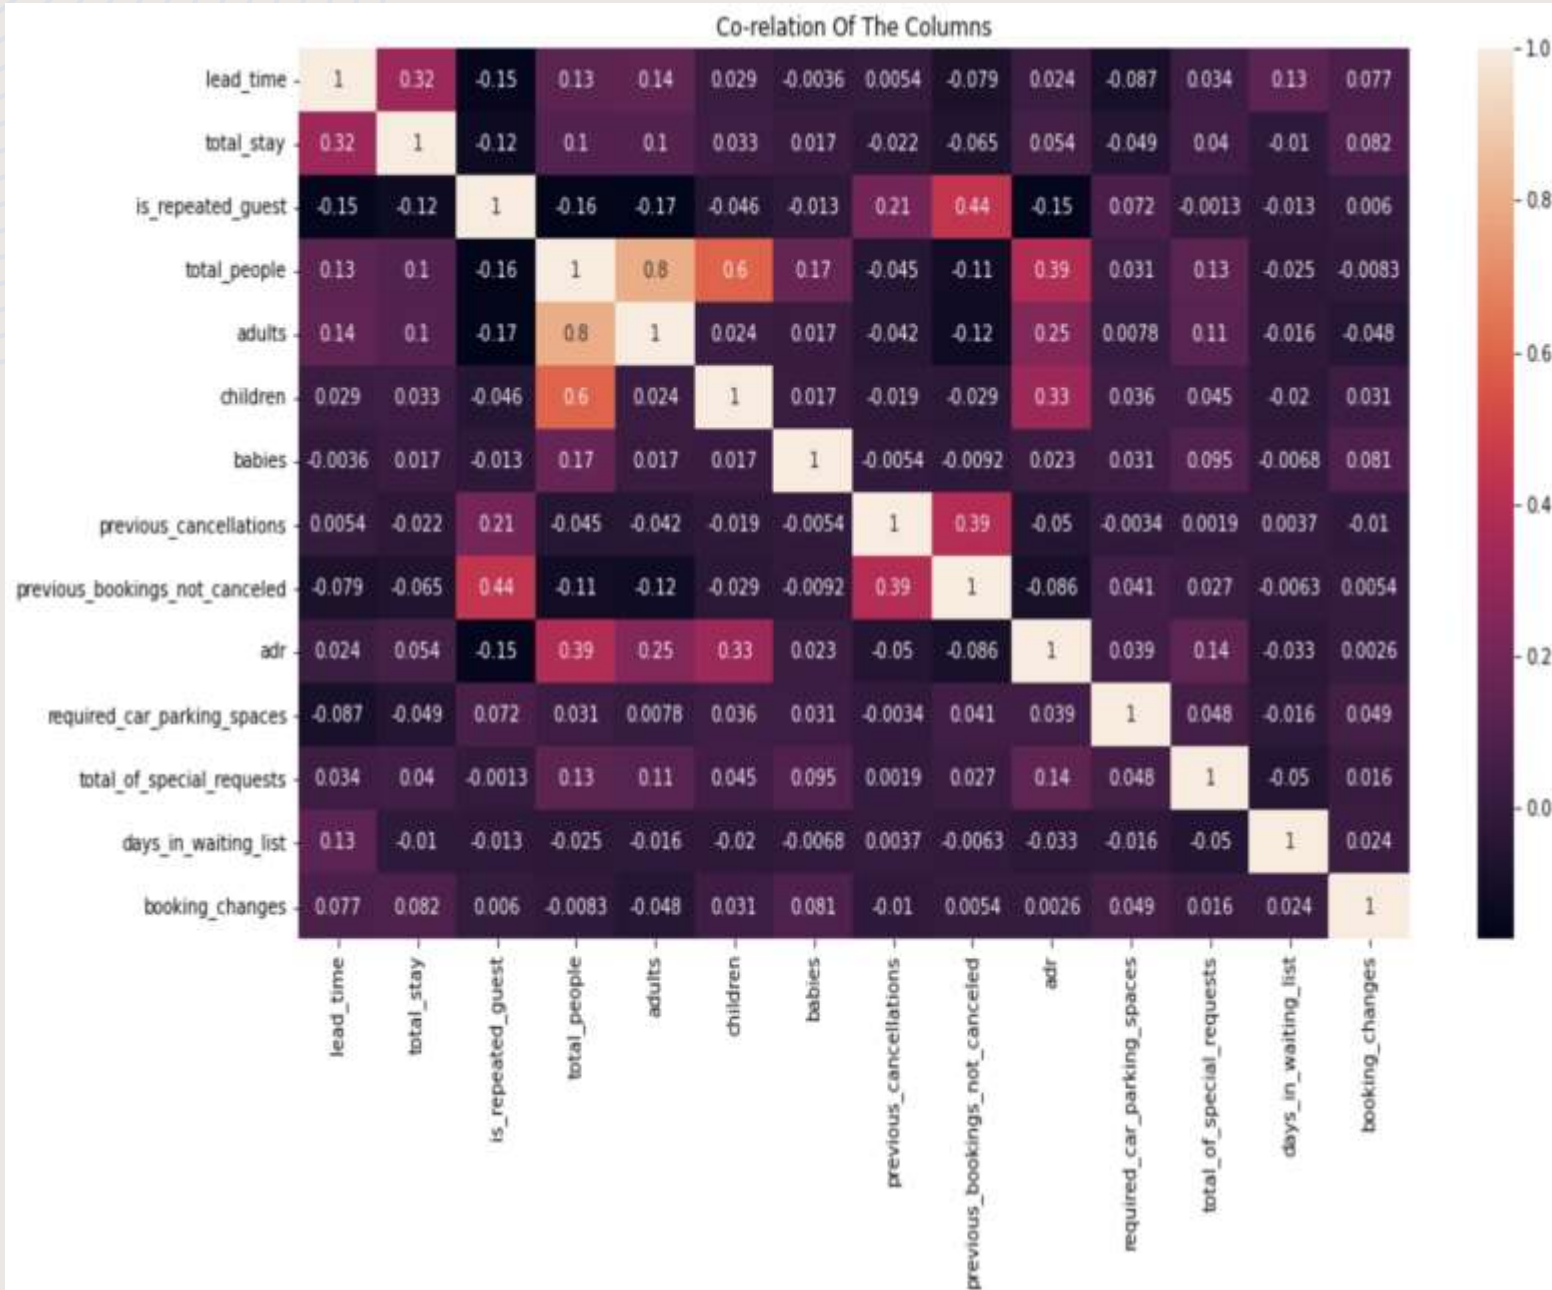

TA/TO is the most common channel for booking hotels.

DISTRIBUTION CHANNEL WITH HIGHEST CANCELLATION PERCENTAGE

INFERENCE:

TA/TO has highest booking cancellation percentage. Bookings made via TA/TO is 30% likely to get cancelled.

INFERENCE:

1. 'total_people' and 'adult' are slightly positive correlated which means that most people staying in the hotel are adults.

2. 'total people' and 'adr' are slightly correlated which means more people more the adr.

3. 'total_people' and 'children' are slightly positive correlated which means that the most people staying in the hotel are also children but is usually less than adults.

4. 'is_repeated_guest' and 'previous_bookings_not_canceled' are positively correlated which means that the repeated guests are mostly those who have not canceled their bookings earlier.

CONCLUSION

- Majority of the hotels booked are city hotel. Definitely need to spend the most targeting fund on those hotel.
- We can also say that the high rate of cancellations can be due to no deposit policies.
- We should also target months between May to Aug. Those are peak months due to the summer period.
- TA/TO should generate better deals for customers as it is the distribution channel with highest booking cancellation.

The background features a large, light cream-colored circle on the left and a large, light pink circle on the right. These two circles overlap in the center. The area where they overlap is filled with a series of thin, white, concentric circular lines that radiate from the center of the pink circle. The top and bottom edges of the image are framed by a solid dark blue color.

THANK YOU
